Premium
Shower
Hardware

603022
Single Towel Hook
(White Cedar)

Manufactured by:

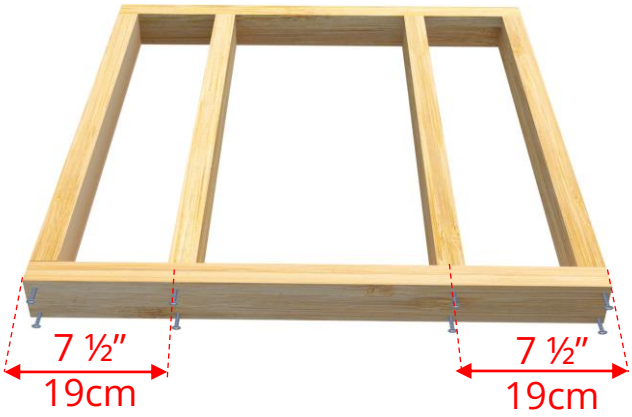

Sierra Outdoor Shower
Assembly Instructions

Locate the shower pillar top plate and secure it to the top of the assemble pillar assembly with 1 ½" (38mm) screws ensuring it is even on both sides.

Secure the front/back floor supports to the 2 outside floor joists with 2 - 2 ½" (64mm) screws in each corner.

Measure 7 ½" from each end and center the inner floor supports and secure with 2 - 2 ½" (64mm) screws in on each end.

**** It is important these are measured correctly as the shower pillar will bolt into these supports.***

Space the floor boards out evenly over the base and secure into each of the floor joists using 2 – 1 ½" (38mm) screws into each joist.

Sierra Outdoor Shower
Assembly Instructions

Position the assembled pillar centered and flush to the back of the shower base.

Secure the assembled pillar to the base with the provided lag screws and brackets.

**** It is recommended to pre drill these holes first to prevent splitting.***

Congratulations on the assembly of your Sierra Outdoor Shower!
